

MOHAMED WALID

Flutter Developer | Mobile Application Developer

+20 1030324294 • moh.roshdy1990@gmail.com • Cairo, Egypt • [GitHub](#) / [Portfolio](#)

PROFESSIONAL SUMMARY

Results-driven Flutter Developer with 2+ years of experience building cross-platform mobile applications for iOS and Android. Proficient in Dart, Flutter, Firebase, and RESTful API integration following Clean Architecture principles. Proven track record delivering production-ready apps (App Store & Play Store) with a focus on performance optimization, state management, and scalable architecture. Experienced in CI/CD pipelines, local databases (Drift), and third-party SDK integration.

TECHNICAL SKILLS

Flutter • Dart • Firebase • Bloc / Provider / Riverpod • Clean Architecture • REST APIs • Git & GitHub • CI/CD • Unit & Integration Testing) • Drift (SQLite) • Firebase Firestore • Deep Linking • Push Notifications • WebView • Google Maps SDK • Third-Party SDKs • Performance Optimization • Node.js / Express.js (backend collaboration) • React (frontend) • iOS & Android deployment

PROFESSIONAL EXPERIENCE

SYMSTAX — Flutter Developer

Jan 2025 – Present

- ▶ Develop and maintain production-grade Flutter applications using Dart, Firebase, and RESTful APIs following Clean Architecture principles.
- ▶ Collaborate with cross-functional teams (product, backend, QA) to deliver high-quality features on schedule.
- ▶ Optimize app performance, resolve production bugs, and implement CI/CD pipelines for automated builds and deployments.

We.yan — Digital Wallet & Financial App

Jun 2025 – Present

- ▶ Engineered a full-featured digital wallet system supporting Top-up, Withdraw, P2P transfers, and External transfers with biometric authentication (Fingerprint & Face ID).
- ▶ Built offline-capable network and app state management using `app_status_provider`, reducing connectivity-related crashes by handling all edge cases.
- ▶ Designed local database schema with Drift (SQLite) to minimize redundant API calls and ensure reliable data persistence.
- ▶ Integrated Google Maps for shop address selection, iCloud/Google Drive backup, and platform sign-in (Google Sign-In, device contacts).
- ▶ Implemented deep-linked local push notifications, WebView for dynamic content, and analytics for expense tracking and transaction history.
- ▶ Contributed to backend API development using Node.js and Express.js. Published on App Store & Play Store.

[Appstore](#) / [GooglePlay](#)

Waqood Driver — Fuel Station App

Jan 2025 – Jun 2025

- ▶ Led UI/UX redesign with intuitive bottom sheets, interactive Google Maps markers, and navigation routing for 1,000+ fuel stations.
- ▶ Built advanced station filtering by fuel type and price, transaction history with receipts, and local notification alerts for promotions.
- ▶ Improved app stability through systematic bug fixing, API optimization, and analytics tracking for user engagement metrics.

[Appstore](#) / [GooglePlay](#)

Mobius POS — Point of Sale App

Jan 2025 – Jun 2025

- ▶ Built a POS mobile application for dedicated merchant devices, including device onboarding, remote configuration via Firebase Firestore, and real-time data synchronization.
- ▶ Implemented remote update mechanism enabling app behavior changes without manual device intervention.
[This app is upload in pos by Aman not from stores](#)

Freelance — Software Developer

May 2024 – Jan 2025

- ▶ Designed and delivered cross-platform Flutter applications for clients, covering full project lifecycle from requirements to Play Store / App Store deployment.

Memoro — Patient & Caregiver Care Platform

May 2026

- ▶ Built a cross-platform Flutter app (Android, iOS, Windows, macOS, Web) connecting patients, family caregivers, and doctors with separate role-based flows and Firebase Auth including email OTP password reset via Cloud Functions.
- ▶ Implemented real-time Firestore-backed chat with FCM push notifications, deep linking, local notifications, and a server-side notification inbox with scheduled retry logic for failed deliveries.
- ▶ Developed SOS / emergency request system storing incidents in Firestore and dispatching high-priority FCM alerts to the connected care professional, with resolution notifications back to the patient.
- ▶ Built medicine adherence tracking, doctor-assigned therapeutic activities, cognitive games, and audio assets — all synchronized bidirectionally between patient and doctor views.
- ▶ Used Riverpod for full app state management; integrated geolocator for SOS location context, image_picker, shared_preferences, and flutter_local_notifications.
- ▶ Authored Node.js Firebase Cloud Functions (v2): Firestore triggers, scheduled retry jobs, callable HTTPS functions, FCM multicast with invalid-token cleanup, and nodemailer transactional email via Firebase Secrets.
- ▶ Added full internationalization (flutter_gen-l10n, ARB sources) and configured native splash screens and launcher icons across all platforms.

EDUCARE — Educational App

2024

- ▶ Developed a Flutter-based student learning app with progress tracking, Firebase auth, cloud storage, QR code scanning, and push notifications.
- ▶ Implemented state management and clean architecture patterns, with responsive UI/UX using Sizer and animations.

Job Finder — Mobile App

2024

- ▶ Built a scalable Flutter starter project with modular clean architecture, navigation setup, state management, and UI scaffolding as a reusable foundation.

EDUCATION

Shrouk Academy — B.Sc. Management Information Systems

2020 – 2024

Relevant coursework: Software Engineering, Database Systems, Information Systems Analysis, Web Technologies.

CERTIFICATIONS & TRAINING

Back-End Development (Node.js) — Route Academy	<i>2025 (In Progress)</i>
Front-End Development (React) — Route Academy	<i>2024</i>
Flutter Diploma — Amit Learning	<i>2023</i>
Network Diploma — Instant	<i>2023</i>
Graphic Design — Russian Computer Center	<i>2020</i>

SOFT SKILLS

Collaboration & Teamwork • Communication • Problem Solving • Time Management • Attention to Detail • Adaptability • Accountability
